The PMP Coordinator will be responsible for the implementation of the school Integrated Pest Management policy.

The school community will be educated about potential pest problems and PMP methods used in the school environment.

Education/Training

The school community will be educated about potential pest problems and PMP methods used in the school environment.

PMP Coordinator

The PMP plan shall provide a description of how each component of the school PMP policy will be implemented at each school.

The PMP plan shall provide a description of how each component of the school PMP policy will be implemented, including the use of pesticides, the role of each school's pest management team, and the frequency of PMP activities.

The school PMP plan will be a blueprint of how the Monoculture Board of Education will manage pests in the school environment.

Development of PMP plans

How impact pesticides and methods are practiced and shall be considered for use first. Options not effective or not reasonable when it is determined that a pesticide shall be used. All pest management methods that are to be used whenever possible. The choice of using a pesticide with a significant ecological effect on the environment.

Each school shall consider the full range of management options, including no action at all. Non-toxic materials and methods, and the environment.

Implementation of PMP procedures will determine when to control pests and whether to use

Interdistrict Pest Management Procedure

Education shall incorporate and maintain in PMP plan as part of the school's policy.

The PMP Coordinator, other school staff, and pest management officials will inform the

School community about potential pest problems and PMP methods used in the

School environment.

The PMP Coordinator will be responsible for the implementation of the school Integrated Pest Management policy.

The school community will be educated about potential pest problems and PMP methods used in the school environment.
